Overview of Committee engagement and structure

Secretary recommendations

(Continuing the forward growth and community of this club)

This year we have seen an increase of almost double in our membership numbers!
We have also established strong roots in our communities, partnering with Adrenaline Vault, and establishing a strong connection to our communities, fostering a positive, interactive place for many different types of climbers. I want to extended and congrats everyone who has been involved with the club this year you should all be immensely proud of the community and space that this club is becoming. Watch this space!

I believe that more consideration needs to be put into this club's growth of its subcommittee, in order to account for the large increase of members and growth of this club, and more consideration to create space and time for the development of this committee, through more committee meetings/ developmental socials.

Overall, this has been a big year for CBC, not without our fair share of trials, I reckon we made it through whole but not unharmed. But also not without our fair share of great successes! We have created a great community and space for this club to lay its roots and grow. I want to extended and congrats to everyone who has been involved with the club this year you should all be immensely proud of the community and space that this club is becoming. Watch this space!
