

Cross Institutional Study

A workshop by the Curtin Physics Club

Why Take Cross-Institutional Units?

Curtin is a great university!

But...

Physics is a small community, and not all topics are taught here.

Cross institutional units allow you to explore a broader range of subjects.

What Units are Available?

Some examples (at UWA):

Symmetry Principles in Physics (S1)

- Sergei Kuzenko.

Differential Geometry and General Relativity (S2)

- Evgeny Buchbinder.

Quantum Field Theory (S2)

- Sergei Kuzenko.

And many more!

$$\begin{aligned}\mathcal{L} = & -\frac{1}{4} F_{\mu\nu} F^{\mu\nu} \\ & + i\bar{\psi} \not{D} \psi + \text{h.c.} \\ & + \chi_i y_{ij} \chi_j \phi + \text{h.c.} \\ & + |D_\mu \phi|^2 - V(\phi)\end{aligned}$$

When Can You Take Them?

Anytime, as long as you have completed **one year of full-time** study at Curtin first.

- Cannot constitute more than 200 credits.

Suggestions based on the physics course:

- Third year semester 2.
- Honours semester 1.
- Honours semester 2.
